EDUCATION

Full Stack Developer

Angel Multimedia Institute
2023 – 2024

Intensive training in full stack web development including frontend frameworks, backend APIs, and database systems. Developed practical projects and gained hands-on experience building responsive, production-ready web applications.

Bachelor of Arts

Dr. C.B Patel Computer College
2021 – 2024

Completed a Bachelor of Arts with specialization in History, studying historical civilizations, political movements, and cultural transformations while developing research, analytical, and documentation skills.

SKILLS

Problem solving

Debugging

REST API integration

Database design

Responsive web development

Performance optimization

Version control (Git)

Software architecture understanding

Code optimization

PROFILE

Full Stack Developer with experience in building responsive and scalable web applications. Skilled in modern frontend and backend technologies, API integration, and database management with a strong focus on performance, clean code, and practical problem solving.

EXPERIENCE

Frontend Developer

2024 – present

Arham Web Works, Surat

Developing and maintaining Shopify applications and custom storefront features using modern JavaScript technologies. Focused on building scalable app functionality, integrating Shopify APIs, and improving store performance through optimized frontend and backend solutions.

- Developed Shopify applications using JavaScript, Remix (React Router), Prisma, GraphQL, and PostgreSQL.
- Built and maintained custom Shopify theme sections using Liquid, HTML, CSS, and JavaScript.
- Integrated Shopify APIs with GraphQL to manage store data and app functionality.
- Designed responsive UI components for Shopify apps using Polaris Web Components.
- Implemented backend data handling and database queries using Prisma ORM with PostgreSQL.
- Optimized application performance by improving API calls, queries, and frontend rendering.
- Debugged and optimized application features to improve performance and reliability.
- Collaborated with the development team using Git for version control and project management.
- Implemented dynamic product and variant functionality within Shopify theme components.
- Developed reusable frontend components to improve maintainability and reduce development time.
- Ensured cross-browser compatibility and responsive layouts across desktop and mobile devices.
- Assisted in deploying and maintaining Shopify apps and theme updates.
- Implemented GraphQL queries and mutations to efficiently fetch and update Shopify store data while minimizing API request overhead.

useful digital products.”

EXPERTISE

Languages

- English – Professional
- Hindi – Fluent
- Gujarati – Native

Technical

- JavaScript (ES6+)
- HTML5
- CSS3
- SQL

Frameworks

- React.js
- Next.js
- Node.js
- Express.js
- Remix (React Router)

Libraries

- jQuery
- Bootstrap
- Tailwind CSS

Databases

- MongoDB
- PostgreSQL
- MySQL

ORM / Data Tools

- Prisma ORM
- Sequelize ORM
- Mongoose ORM

APIs & Data

- GraphQL
- REST APIs

PROJECTS

Real projects. Real learning. Real impact.

Personal Portfolio Website

Personal Project

2025

A modern developer portfolio showcasing projects, technical skills, and interactive UI experiences designed to attract recruiters and clients with a polished design and smooth animations.

- Designed a modern, visually polished UI with clean layouts and strong typography.
- Built the entire frontend using React for modular, scalable component architecture.
- Implemented responsive styling and a consistent design system using TailwindCSS.
- Added smooth, high-quality animations and transitions powered by Motion.dev.

Tech:

Next.js

JavaScript

TailwindCSS

Motion.dev

MagicUI

TaskEra

Personal Project

2025

TaskEra is a personal task management platform designed to simplify task organization and improve productivity through a clean UI, real-time updates, secure authentication, and smart task categorization.

- Implemented secure user authentication using JWT for protected routes.
- Developed task creation, categorization, and status updates with real-time UI feedback.
- Added features like due dates, priority levels, and progress tracking.
- Integrated MongoDB for scalable and reliable data storage.

Tech:

React

JavaScript

TailwindCSS

Node.js

Express.js

MongoDB

DevToolbox

Personal Project

2026

DevToolbox is a comprehensive developer utility platform built with Next.js that provides 150+ tools including encoders/decoders, hash generators, JSON & CSV formatters, cron parsers, networking utilities, text processors, CSS generators, SEO helpers, and DevOps tools. All utilities run directly in the browser without storing user data, ensuring high performance, privacy, and zero authentication friction.

- Architected a scalable multi-tool system using Next.js with reusable dynamic tool components.
- Implemented fully client-side execution to eliminate backend dependency and improve performance.
- Structured tools into categorized modules (Security, Network, Date/Time, Text, CSS, DevOps, SEO).
- Designed a responsive and developer-centric UI using TailwindCSS.
- Deployed globally on Vercel for optimized edge performance and fast load times.

Tech:

Next.js

JavaScript

TailwindCSS

Check Project Health

Personal Project

2025

A web-based tool designed to analyze project metrics and provide insights into project health, helping developers and teams monitor progress, identify potential risks, and improve project management.

- Developed a project analysis tool to evaluate project performance and progress indicators.
- Built interactive dashboards to visualize project status and health metrics.
- Added CLI dashboard rendering with cli-table3, chalk, ora, and boxen for structured terminal UI.

Tech:

Node.js

JavaScript

Commander

Chalk

Cli-table3

Git

CareerPath.ai

Personal Project

2025

An AI-powered career guidance platform that analyzes user information and generates personalized career recommendations, learning paths, and salary insights using modern frontend technologies and AI integration.

- Built a dynamic multi-step form system with validation using React.
- Implemented AI-driven career recommendation logic using Gen-AI.
- Visualized career growth and salary insights using Chart.js.
- Designed a fully responsive UI using TailwindCSS.
- Developed a component-based architecture for scalable frontend development.

Tech:

React

JavaScript

TailwindCSS

Chart.js
